PROFESSIONAL SUMMARY

Software engineering graduate with hands-on IT experience at BC Hydro, working between business users and technical teams. Redesigned a manual quarterly access review into an automated workflow that cut processing time by 80%, and authored SOPs adopted across the support team. Defines requirements and tests solutions against them, from changes to AMS field tools to an AI job-fit tool validated against a 14-case answer key. As co-founder of a food-rescue marketplace, defines product requirements and evaluates vendors. Uses SQL, Python and Power BI to analyze problems and explain solutions clearly to non-technical stakeholders.

SKILLS

Business Analysis: stakeholder engagement, requirements gathering, process design and improvement, access and software audits, software testing, incident and change management.
Documentation: SOPs, root-cause analyses, build guides, user guides, audit reports.
Data & Reporting: SQL, Power BI, Tableau, Excel, Python (pandas), PostgreSQL, Snowflake, dbt.
Technical: Windows, Linux, PowerShell, REST APIs, AWS, Docker, Git, Claude API.

WORK EXPERIENCE

IT Application Support Specialist, *BC Hydro* Burnaby, BC | Jun 2025 – Present

- Redesigned the manual quarterly Meter Lab access review into an automated Python (pandas) workflow that reconciles four OnGuard data sources and flags added/removed users, duplicates and access changes; cut processing time by 80%.
- Partner with five security group owners each quarter to validate flagged access changes before the master access dataset is updated.
- Delivered the workflow to end users with automated Excel and HTML reports, a version-checked launcher and Word user documentation.
- Designing a software audit process for three AMS production jumphosts, defining its scope and procedure; updated the AMS Jumphost Build Guide to v1.0.
- Authored audit and root-cause-analysis SOPs adopted across the support team, reducing mean-time-to-resolution on P1 issues.
- Support Field Service Representatives on AMS systems and field tools, tracking tickets to resolution and escalating to technical teams; contribute to incident and change management and software testing, and serve on-call for production issues.

Computer Vision Engineering Intern, *Business and Technology Services* Astana, Kazakhstan | May 2024 – Aug 2024

- Prepared and labeled a 1,000+ image dataset with Python and OpenCV, and trained a YOLOv8 model that improved sitemap orientation prediction accuracy by 7%.

Smart Meter Data Analyst Co-op, *BC Hydro* Langley, BC | Sep 2023 – Apr 2024

- Produced weekly device health reports with SQL and Excel, and built Power BI and Tableau dashboards that gave stakeholders visibility into device performance.
- Coordinated with field crews on device installations, accelerating deployment schedules by 5%.
- Automated routine diagnostic checks with PowerShell scripts, reducing manual processing time by 50%.
- Monitored smart metering networks of 2M+ devices, diagnosing malfunctions to maintain 99% uptime.

PROJECTS

Job Search Agent — AI Job-Fit Tool, *Personal project* github.com/AlmatB22/job-search-agent | Oct 2026

- Defined requirements and a written scoring rubric for a tool that checks job postings against my resumes and drafts resume bullets that cite their sources.
- Validated it against a 14-posting answer key run three times each, with a check that drops any uncited claim and a human approval step before results are saved.

ULES — Food-Rescue Marketplace, *Co-founder* Feb 2026 – Present

- Define product requirements for consumer and merchant mobile apps for the Kazakhstan market, built with React Native, Next.js and Supabase.
- Evaluated and compared geocoding and payment providers, and integrated a one-time-password login API.
- Ran a pre-release audit of both apps, tracking 26 findings.

EDUCATION

Bachelor of Software Engineering, *Thompson Rivers University* Kamloops, BC | Sep 2020 – May 2025

- GPA: 4.06/4.33 — Dean's List every semester; Teaching Assistant for Engineering Design II.
- Awards: TELUS Excellence in Science $1,000 (2025), Eng & Geoscientists BC $1,000 (2022), Undergraduate Research Apprenticeship ×2 (2022, 2023).
